South African product range

Are you using the right tools for **your client, your context** and **your budget**?

JvR is proud to represent highly respected South African researchers and test developers, and to distribute products that have been developed in South Africa, primarily for a South African market. These assessments are:

- Developed by South African experts,
- Locally validated,
- Available immediately and
- Very affordable

JvR started the range in 2004 and it has been growing steadily ever since. We now have a diverse range of assessments mapping a wide variety of areas. Most require a professional registration to gain access, a few insist on compulsory training programmes. See the summary table on the next page...
